

In response to trade community requests, the U.S. Customs Service, Office of Information and Technology (OIT) and Census Bureau, Foreign Trade Division has assembled a list of companies/persons offering data processing services to the trade community for the Automated Export System (AES). Inclusion on this list does not constitute any form of an endorsement by the U.S. Customs Service or Census Bureau as to the nature, extent, or quality to the services that may be provided.

The organizations shown on the attached list may not offer all the services required for full AES participation. They may be a software vendor who will provide the needed software for handling AES data, or a service bureau or port authority who acts as a communications and software source for transmitting and receiving Customs data for AES participants. For your convenience, the providers have been separated into 2 groups for being (1) AES certified or (2) having a letter of intent to begin testing. It is the responsibility of the user to obtain specific operational status and capabilities from the particular organization. Each group is defined as follows:

Certified – These service providers have fully developed AES software and/or a service that has successfully passed the U.S. Customs certification process. The software and/or service is available for use with AES.

Letter of Intent – These service providers have sent in a letter of intent to U.S. Customs and are currently beginning to develop software and/or a service to make available for use with AES.

The decision to utilize a specific data processing service is strictly an individual user decision. The software/service descriptions on the following pages have been provided by the vendors and in no way reflect endorsement of any particular vendor/service bureau by the U.S. Customs Service or the U.S. Bureau of the Census.

CERTIFIED Service Providers

ADVANCED TRANSPORTATION SYSTEMS, INC.

7730 North Union Blvd., Suite 203
Colorado Springs, CO 80920
